US–China tariffs and Brazilian soybean expansion

01 Soybean trade shifted toward Brazil

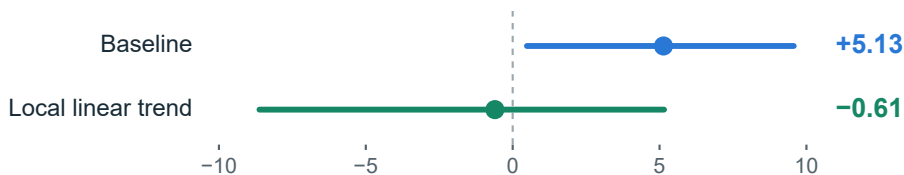
Exports to China · 2017 → 2018 · million tonnes

United States
31.7 → 8.2
−74%

Brazil
53.8 → 68.6
+27%

02 Soybean-area estimates depend on the model

Mean observed − counterfactual area · 2019–2024



Million hectares · points: means; lines: 95% posterior intervals

03 Most soybean entry followed managed land

2019–2024 gross entry · two overlapping history measures

97.2%
Managed land
in the previous year

6.1%
Native cover in any of
the preceding five years

Native cover includes forest, savanna, and grassland.

Tariff-driven expansion is not established.
Indirect forest loss is not ruled out.
